Nutricia specialises in advanced medical nutrition for the sick, the infirm and the elderly. Nutricia provide products that focus on the dietary management of specific conditions, such as swallowing problems. Nutilis and Nutilis Clear are designed for the dietary management of dysphagia and can be used to modify the texture of both food and fluids. They have a unique amylase resistant feature to protect against the action of amylase, in order to help ensure a safer swallow by maintaining correct consistency in the mouth. Go to www.dysphagia.ie for more information.
