Passy-Muir, Inc. is the manufacturer of the only closed position, no-leak valve which can be used for tracheostomy patients either on or off mechanical ventilator support. By restoring more normal upper aero-digestive function the Passy-Muir[®] Valve can restore phonation, improve the swallow, improve airway clearance, and enhance postural stability and other important physiologic functions negatively impacted by the open tracheostomy. Passy Muir is also a significant provider of educational products, material and services related to tracheostomy clinical issues.
