www.bigbraindrain.com

Online International Healthcare Learning Platform, providing on-demand modules and courses to therapists, healthcare professionals, clients, and their families. We are actively looking for new course authors who would like to share their learning with the world at large. Unlike other online platforms, we have different levels of entry for professionals who wish to write courses. You can be as active in creating the course as your schedule allows. You can also just send us a PowerPoint file and we will do the rest! Find out more at www.bigbraindrain.com or visit us at our stand. See you then.
