Tellable is a Language Action Game. It is a motivating game of verbal interaction and conversational success that extends language skills. Breakdown and repair strategies are practiced in a familiar card game style.

Tellable consists of 4 screens and 6 decks of 16 pairs of picture cards carefully selected to include visual, auditory and meaning distractors. The screens increase the fun and learning because listeners can't see any gesture to help their understanding.

Tellable is recommended for use with school children, learners of a foreign language and people with aphasia.
